$\int_{\mathfrak{B}}^{2}$

6

- (a) expressing interferon- α in E. coli transformed with a vector comprising an E. coli alkaline phosphatase (phoA) promoter operably linked to a nucleotide sequence encoding the signal peptide for the heat stable enterotoxin II (STII) of E. coli, said nucleotide sequence encoding the signal peptide being operably linked to a nucleotide sequence which codes for mature interferon- α ; and
 - (b) isolating the expressed interferon- α .

 $\begin{bmatrix} 1 \\ 2 \\ 3 \\ 4 \end{bmatrix}$

The signal paper of the signal peptide of the heat stable enterotoxin II (STII) of E. coli, wherein said nucleotide sequence coding for the signal peptide is operably linked to a DNA molecule which codes for mature human interferon- α .

Please add the following new claims:

- --25. A method for the efficient production of correctly folded and disulfide bond-linked interferon- α in $E.\ coli$, comprising the steps of:
- (a) expressing interferon- α in *E. coli* transformed with a vector comprising an *E. coli* alkaline phosphatase (phoA) promoter operably linked to a nucleotide sequence encoding the signal peptide for the heat stable enterotoxin II (STII) of *E. coli*, said signal peptide being operably linked to a nucleotide sequence which codes for mature interferon- α to give a biomass; and

- (b) isolating the expressed interferon- α from the biomass.
- 26. The method of claim 25, wherein said interferon- α is interferon- α 2.
- 27. The method of claim 26, wherein said interferon-α2 is encoded by an amino acid sequence comprising the sequence of SEQ ID NO:5.
- 28. The method of claim 26, wherein said interferon- α 2 is encoded by a nucleotide sequence comprising the sequence of SEQ ID NO:6 or a sequence encoding interferon- α which has more than about 70% sequence identity with this sequence.
- 29. The method of claim 26, wherein said interferon- α 2 is encoded by a nucleotide sequence comprising the sequence of SEQ ID NO:7 or a sequence encoding interferon- α which has more than about 70% sequence identity with this sequence.
- 30. The method of claim 25, wherein 340 \pm 100 mg of said interferon- α is obtained from 1 kg of the biomass in step (b).

Remarks

Claims 2 and 18 have been canceled, claims 1 and 17 have been amended, and new claims 25-30 have been added. Claims 1, 3-9, 17, 19-21, and 24-30 are thus pending in the above-captioned application.
